DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Schrott et al. DE 3600902.

DE 3600902 teaches a method of making a shaped flexible graphite foil having impressions therein created by a multiple stamping process. The oscillation limitation claimed by applicant is met by the DE 3600902 reference which reads on the multiple stamping. DE 3600902 teaches an apparatus and method for making an optical disc. The plurality of impressions made by the forming element as claimed by applicant is equivalent the step of making grooves or impressions in the optical disc which is taught by DE 3600902. With respect to the applicant's claims on controlling the amplitude and frequency of the oscillations in the dependent claims, this would be inherently met by DE 3600902 who because the multiple stamping and the stamp would inherently provide a shaped form having a controlled frequency and amplitude, the stamp itself would inherently provide a controlled amplitude.
